# FUNERAL DIRECTOR EXPOSES COVID'S SCAM

(Updated on 01 01 2024)

## 1- Introduction

Dear brothers and friends, as we told you in a recent teaching entitled "**The Covid-19 Lie Exposed**", God is stirring up the courage of many human and honest men and women, to denounce and expose the great lie of the century called the Covid-19 Pandemic. The text we offer you this time is the testimony of **John O'Looney**, a funeral director from Milton Keynes in the United Kingdom, who, after initially believing that the Covid-19 pandemic was true, soon realized that it was not.

As you will read below, this man, because of his position, has been at the centre of the management of the people who died during this alleged pandemic. He is therefore in a better position than anyone else to confirm that the Covid-19 pandemic is a farce. He also confirms what the British Author and Speaker **David Icke** revealed to us before the beginning of this so-called pandemic. If you have not yet read this revelation, you will find it on the website [www.mcreveil.org](http://www.mcreveil.org), in the Health section. It is entitled: "**David Icke: The Covid-19 Conspiracy**".

The text below is a transcript of the video (available on [mcreveil.org](http://mcreveil.org)) of the interview with funeral director John O'Looney, by **Max Igan**, an Australian Researcher and Speaker. Please read it in full.

## 2- Beginning of Interview

**Max:** Hi, folks, I just had a conversation with a funeral director from Milton Keynes in the UK. I was going to run the conversation like an interview and then I decided no, I'll just let him speak. And then after that I was going to edit it down and create some sort of a presentable clip for you. But after listening to it back, I thought no I'm just going to play the entire conversation in its raw form, warts and all, and let you hear what this man had to say. And I think it's extremely important, folks, this man has some compelling information that everybody needs to hear.

**Max:** So you're a funeral director. Hi John.

**John:** Yeah, I am indeed. My name's John. I'm a funeral director of 15 years. I'm based in the UK in a place called Milton Keynes, which is kind of forty miles.

**Max:** Lovely place. I've been there...

**John:** Okay, well it's a small world my friend. So I've been a funeral director for about 15 years now. Ten of those were for one of the big funeral providers in the industry, "*Co-op Funeral Care*". And then five years ago, I jumped ship and set up on my own because I wasn't really happy with how things were being done at the Co-Op following the collapse of the bank. You know, people kind of became cash cows instead of being treated the way they should be, in my opinion.

**Max:** So what are you seeing now being a funeral director? How are you seeing things over the last couple of years? Did you see a pandemic last year?

**John:** And so let me start from the beginning. So in 2019, I had a family come and see me who had lost a loved one. And they lost a loved one in the neighbour and borough of Northampton. So they asked me to go to Northampton and collect their loved one, and they complained at the time that the hospital wouldn't let them see that loved one. So I went to the Northampton Hospital and kind of collected their loved one, and while I was there, I asked the guys there in the mortuary, you know, why wouldn't you let this family see their loved one and they opened the chapel doors, or the viewing room doors, and there was a great big inflatable kind of blow up pandemic mortuary, I've since found out it is, and they told me there was something really horrible coming and this is why because the viewing room was being used by this bit of kit. And that was my kind of introduction to Covid. And that was back in end of November, beginning of December 2019. So Christmas came.

**Max:** So they already had this temporary morgue and knew something terrible was coming in November 2019?

**John:** Yeah, yeah, I saw it first-hand, I was told that, based on the story that I've just told you kind of thing.

**Max:** Hmm. Okay.

**John:** So the news broke just after Christmas. And we were all told about a Chinese lab and the Wuhan wet market that had been there for hundreds of years without an issue that suddenly was an issue. The hysteria was mounting, and it wasn't long into 2020 before I was contacted by the local BBC. They knew that I was a funeral director, and they asked to come out and do a report around Covid. And I'd hasten to add, at this time, early on in the process, I believed Covid exactly the same as everyone else. I was convinced it was real, we were being told it was real. And you have to remember that if I go to a hospital, and for example, they tell me a deceased is HIV, or, for example, is tuberculosis, and then obviously, that's something I would take very seriously and Covid was no exception. So I was kind of trying to be as careful as I possibly could. The BBC came, they brought a camera man and a lady that spoke to me. They briefed me very intently on what they were going to ask me and told me the answers they wanted. And they asked me to dress up in full PPE. And I was a bit reluctant at the time, because, do you know, I mean, all funeral directors we use aprons, and obviously gloves, but masks and stuff like that it's not something we would usually use.

I worked for the coroner for seven years and the only time I would ever use a mask there is if I was attending the scene of a death where that deceased had perhaps been there for a while, an undiscovered death, and then you put Vics on the mask and the idea is just to keep the smell away. It's not going to protect you against anything, least of all virus. So they got the interview they wanted and promoted the hysteria, and I kind of kick myself now because any of it is not true.

So very soon into 2020 funeral directors began panicking, the death rate wasn't there though, there was no increased death rate that we were seeing. Deceased were deliberately labelled with Covid. But there wasn't any increase in numbers at all, and that was across the board. As far as I was aware, certainly every

funeral director I spoke to, and every mortuary I went into weren't seeing pandemic numbers. We were seeing people that were labelled with Covid. But you know, how deadly was that? I really can't tell you.

So, I had a family come and see me who'd lost a young child and the child was six and a cancer sufferer so totally not related. Basically, they wanted to see their little girl and this was at a time when other funeral directors were taking body bags and coffins still at hospital and sealing people straight in those body bags and coffins there and then. There was no dressing, no viewings, nothing like that, because they could do it because of Covid. I felt that that wasn't fair to those people that had lost someone via a zoom call, or standing there in a hazmat suit, that just isn't fair. So I wanted to dress this little girl and gave the family time to see their child as any decent human would. And I kind of came to the conclusion then, do you know, my job is to look after people and if that means that I fall over in the process of doing that, so be it and I've washed and dressed everyone the whole way through Covid regardless of whether they have been Covid diagnosis or not.

**Max:** Again, funny that you haven't died of Covid brother.

**John:** Well that not only that, but my wife's helped me and I've also got an embalmer who works for me full time who's 55. He's a heart attack survivor of 10 years now. None of us have had a day off, we're all perfectly healthy. And they streamline the process now where doctors are not in attendance for a death, the police are not in attendance for a death. And whoever is on the scene rings the doctor, the doctor says, *"okay, if you're sure they're dead, ring the undertaker"*, we go straight out and I was picking these people up still warm? So it wasn't like they were sitting in refrigeration or cold storage for a week. And any virus they might have had had disappeared. If they were Covid patients and they were infectious I'm sure I would have got it because I've not worn a mask the whole time. And neither has my wife and neither has my embalmer.

**Max:** So what are you seeing with numbers now?

**John:** So we're kind of rewinding back to 2020. In March and April, we saw a brief spike for about two weeks, two and a half weeks, maybe three weeks, where unusually the phone started ringing. And as a society, we're very good at getting people to pass away in hospital. And I would say if I have 10 collections of deceased, eight of them would be hospital removals. One of them would be from a care home. And one of them would be either a residential address where someone's gone home to die, or a hospice where people go to die for palliative care.

And we suddenly had an announcement on the TV from Government that they were going to try and protect the most vulnerable in care homes, and that these care homes would be the places that were hit the hardest, which I kind of at the time thought was really strange, because I don't understand how a virus can attack a specific building. Do you know, it either is in the community, or it isn't in the community, and it was thing after thing that just wasn't making sense on the coalface as an undertaker. So I got called every night for three weeks to care homes. And this was at a time when Matt Hancock, who's since been dismissed from Government, kind of had transferred all of the elderly in hospitals

into care homes, He'd been very careful to label them all as Covid. And he put them into care homes. And I've since found out that at the exact same time, there was 1,000 percent increase in the amount of midazolam sedative purchased at that time. And there's an extensive paper trail that documents that very clearly.

Now, I worked for the big funeral provider for 10 years who have 60 percent market share and, in that time, I was never ever ever, ever called to a care home three consecutive nights. You know so for me being a small family undertaker to suddenly be called every night for nearly three weeks exclusively to care homes and nowhere else is remarkably, is probably about as likely as me winning the lottery several times in three weeks. It just doesn't happen. It's impossible. And I would hasten to add that all of those people were labelled with Covid. I never saw a doctor in attendance once. No doctor ever attended to my knowledge. I never saw a Covid test once. I never saw a ventilator. So there was no need for those patients to be overdosed, shall we say, or heavily sedated to be intubated because there were no ventilators? ***So I suspect that 1000s of people were killed, euthanized in these care homes using midazolam. And on the odd occasion, I did, in fact see small files, perhaps on the bedside cabinet or in a bin*** because I was actually looking for them at that point, where they hadn't perhaps been as careful as they ought to have been doing that kind of thing. So that was something that was, kind of raised alarm for me.

And then, as abruptly as that started, it finished. And then I had a pandemic guy ring me and he introduced himself as a government sponsored pandemic guy. And he told me that as a funeral director, his job was to call all of the funeral directors in the area, and he was to collate the numbers of deceased. So first of all, he would ask me, for example, what my capacity was at the funeral home. So how many I could hold here at the funeral home, how many I'd picked up that week, how many were Covid, and how many you know where they'd come from kind of thing. So it wasn't really very long, he used to call every Monday, he almost immediately started steering me, and by that the conversation would go much like, I picked a guy up from a care home that was in his 90s, he'd had a full life, no doctor in attendance, no Covid test. He wasn't a Covid death, it was a natural death of a guy of 95. And I picked up someone from the local hospice who had succumbed to cancer, he was a terminal cancer patient, both of them were instantly labelled as Covid. Because the guy said, we were told they were Covid, there must be Covid in there, we've got to put them down as Covid. Everyone, even one guy that was run over, every death possible was listed as a Covid death when they just weren't Covid deaths.

And I had people coming in, really upset families, because they knew their loved ones had had terminal cancer, and they were terrified that I wouldn't wash and dress them because they'd been labelled with Covid. And I kind of had to assure them, you know, *"please don't worry, I will"*. And I did, I looked after every one of them, and washed and dressed them all, because that's what they deserved. And I was doing this kind of waiting to see if I'd fall over, every morning I woke up, and I took a deep breath, and then crack on. And lo and behold, I'm still here, as is my wife, as is my embalmer you know. So the year 2020 progressed

normally, apart from that 12 week cull that took place in care homes, and I'm very careful the words I choose because I know that's what it was. Statistically, it's impossible to happen. You know, viruses don't target care homes, exclusively. The care homes are full of people that can't say no,

**Max:** Yeah, they've set that up and they've brought midazolam there simply so they could get their numbers up and claim that there's a wave.

**John:** Yeah, of course they have. And the paper trail tells the story and interestingly, I did a funeral a little while ago for a family and one of the family members worked in the local pharmacy in our local hospital. And she confirmed cos I couldn't resist asking her, *"did you buy loads of this in?"* She said, *"yes"*.

**Max:** Yeah. So what are you seeing now that the vaccines are rolling out, brother?

**John:** So 2020, finished kind of November, December time, and they were widely advertising that they were going to begin vaccinations on January the sixth locally. It was rolled out in different areas at different times in different parts of the world. But we were all told the lifesaver was coming in January. And I couldn't believe it really. The pandemic guy would call once a week, and it would be, *"hi John, how you doing? Everything good"*. *"Yeah, it's still really quiet"*. And he actually admitted to me, he said, ***"I don't honestly know why I'm doing this job, he said, because there are no Covid deaths and everyone's saying the same thing."*** That's from the guy that was speaking to all of the funeral directors locally. That guy said that to me personally, and he was being sincere. And shortly after they began vaccinating, I was notified he would no longer be calling. So clearly, there's no need for the pandemic guy to record Covid deaths now, because they've stopped him from doing so.

November December came and went. We were doing funerals. It wasn't busy. In fact, even despite the great effort they made in care homes to bump the numbers up, overall 2020 was quieter than 2019 for death rate and the vast majority of funerals we do in the UK are cremation funerals, I would estimate, around 95 percent of them are cremations. And the odd 5 percent would be burials. We weren't up on numbers, and it was the same everywhere. The statistics don't lie. They're their government statistics that show there was no real increase. And it kind of got to the point where I said to a few people, I began to smell a rat. We weren't being told the truth. And I said to people, *"I bet the death rate soars in January when they begin vaccinating."* And everybody laughed at me. They said, *"no don't be so stupid you're mad."*

***We came back to work on the second. And on the sixth they began vaccinating, and the death rate was extraordinary. I've never seen anything like it as a funeral director in 15 years,*** and neither is anyone else that I've spoken to. And it began exactly when they began putting needles in arms. That was the recognised "second wave". And that went on for about 12 weeks and finished abruptly the second week of April and to be honest with you, I'd never want to see a death rate like it again. It was awful. And they were very different this time. It was a mixture of all ages and all locations as well, it wasn't for example, all care homes. It was hospitals, residential addresses, mostly

hospital deaths, to be honest with you. And it was just awful. That was pandemic numbers, but it was only when they began vaccinating, and never before that point.

**Max:** Were they labelling all these people as Covid deaths.

**John:** Oh, yeah, as many as they possibly could. But I suspect they were vaccine injury deaths, the vast majority of them, or perhaps overdoses of midazolam, or perhaps also, a contributing factor is the blatant neglect of people, a lot of families that I've got are telling me their loved ones have died from cancer, and they've only managed to present at stage four, because nobody will see them, they're not going for scans anymore, they can't get an appointment. They've been fobbed off with Gaviscon when they've got pancreatic cancer, and stuff like that. And it's just not being looked at.

So there's a clear pattern there kind of emerging. And that went on till April 21, and then abruptly stopped. And then what we were seeing was literally the quietest period I've ever known, certainly in five years, and that's the first time in five years as an established funeral director now that we actually lost money, because there just wasn't any one really passing away. And it wasn't unique to me, I'm in a number of other groups with funeral directors, and we joined these groups at the beginning of the pandemic, thinking that we would perhaps need to support each other during the Covid pandemic, if one of us fell over, and I'd hasten to add, nobody has.

So about three weeks ago, the death rate started to pick up again. And I'm now seeing people of all ages in and all of them are vaccine recipients almost exclusively. And the range of deaths is heart attack, a sudden undiscovered heart condition that's led to a heart attack, blood clots, stroke, and multiple organ failure. And those are the four consistent types of death that I'm seeing. And it's all ages.

I went into my local barbers a couple of weeks ago to get my haircut, and they're all very sombre and down. I kind of said, alright, guys, what's up, one of the barbers in there 23 had died an hour and a half after he'd taken his second jab, heart attack at 23 years old. I've had a guy in whose father went down and got a jab and was paralysed almost instantly. He was then seen as vulnerable. So they gave him a second jab three weeks in and he was found dead at home the following day. I've had a gentleman in who I was doing a funeral for, his mum went blind almost immediately.

Obviously, since I've gone public about my concerns, nobody wants to talk to me now, the BBC. The silence is deafening. They're quite happy for me to promote the hysteria. But now I'm actually voicing concerns and seeing a pattern of death related directly to the vaccines, nobody wants to talk about it now. And this is despite the fact that there are a number of very eminent people, and thousands of doctors globally, nurses, consultants, professors, virologists, all saying the same thing. The government seem to be pressing ahead and blackmailing, coercing and forcing people and slowly creating a two tier kind of Nazi type society for a pandemic that isn't there.

***And the Delta variant I can tell you is widely recognised within the NHS (National Health Service) as vaccine injury.*** It is not a virus, it's vaccine injury. And I can tell you as a funeral director working on the coalface you've been told a very elaborate lie to convince everyone that they're ill and there's a dangerous virus and you need a lifesaving jab.

And the real death rate was in care homes as a result of midazolam and then the deliberate relabelling of every normal death as a Covid death. And then we've seen the extreme death rate once they actually began vaccinating. And it is definitely 100 percent that I can tell you as a funeral director. Now some of the families that come to me are totally unaware. And I ask every family is their loved one jabbed, and they'll say, yeah, they're double jabbed but it couldn't have been that because it was eight weeks ago. They just don't see the connection. And I'm not there to call their bluff. I'm there to look after their mum or dad, I see the connection consistently. And I also see great efforts being made not to acknowledge it.

Now, two things are going to happen shortly, I can tell you this with amazing foresight, they're already jabbing children, they've been inventing new variants, a newly named variant every other month. And the idea of that there is a variant is to get you used to the idea of there being a variant. And what will happen shortly with all these children that they're injecting is children will get sick, and children will die as a direct result of these injections. It'll swiftly be labelled as a new variant. They will parade crisis actors, and bereaved parents on the TV and mainstream media, urging you to get a jab and protect the children. It's a certainty, it will happen, and I'm waiting for it to happen. 100 percent, I've got no doubt in my mind. And you'll all be amazed at the amazing foresight I had. If you're in any doubt, take a look at where you live and what is going on, and who's passing away. And they're all jab recipients and any funeral director with an ounce of integrity and honesty will tell you that. And since kind of going public, I've had about 45 different funeral directors or people working in the funeral industry that have directly reached out to me, they're very aware of what's gone on. They're all very, very scared and frightened. If they're willing to murder people the way that they're doing, I suspect that they won't think twice about silencing people like myself.

And I know my days are numbered for daring to speak the truth. But the reality is there is no Covid pandemic and I'm living proof of that. It's all been designed to get you to believe it and to take a vaccine. Do you know how many children I've had in or that I've heard through my network of funeral directors in maybe a 50 or 60 mile radius, children that have died from Covid since it began? Not one. Not a single child has passed away from Covid that I'm aware of. And I would be aware, because it would be big news, I don't doubt somewhere they will magic up some child and label them with a "Covid death" because they've done that with many other deaths. There are no children that have died from Covid. So there is no reason whatsoever to put these gene therapies into children. ***It is absolutely indefensible and the fact that they try and coerce a child of 12 to give consent when they can't consent to sex, they can't buy a beer, they can't get married, and they can't vote kind of tells the story.***

Here we have a depopulation agenda. And a part of that depopulation is two fronts that they attack on. One is to kill people. And I'm seeing that as a funeral director. And number two is to sterilise or disable children to stop them from repopulating later on in life. And you have to remember that a child of 12 who's given an injection that's going to affect their fertility, when will that become apparent? If they're don't die, and they're not sick, it's going to be 10 years really before anyone knows. And I can tell you that is what's happening, I'm utterly convinced. And I've had 40 to 45 funeral directors for all different companies, some of them for the Co-Op workers have reached out to me very scared, and they've said they totally agree with me. I've spoken to nurses of 20 and 30 years and I've also spoken to doctors, professors, and more harrowingly a number of victims, a large number, an ever growing number of victims and people that have kind of said, *thank you so much* and reached out to me because they've got nowhere else to go. You know, because nobody's listening to them. They're not interested. They're so busy oppressing them and blackmailing them and coercing them into lining up for a jab that's killing them.

You know now, the one thing that's going to happen is the children. The second thing that we're going to find right is in the NHS, they're in the same circle that I am, they see what's happening. And I can tell you they see the suffering before that deceased comes to me. So they know full well that this delta variant they mentioned a while ago, is vaccine injury, and I've had that confirmed to me by a plethora of medical specialists. One of them I looked after last year, he was a guy that lost his partner. And he confided in me, he said, *"they're extremely dangerous. Please John, don't touch them."* And this man has a family. And he said that he would never take it, he said, because they're extremely dangerous. And he went on to explain to me that the testing procedures were actually halted. They were getting through 200 rhesus monkeys a week. That was testing because they're all dying. So they stopped animal testing. And this is the same stuff they're putting in your veins in these immunisation centres, for a kebab, for a free taxi ride, for a reduction in your jail term. It's not normal. Why can't people see that?

But we've now got people everywhere that are so convinced, because they've had 18 months of total brainwashing that they believe it and they're scared to death. And I watch children walk to school with a mask on in the open air, people sitting in their cars they're all terrified, and they're not being told the truth. ***The truth is, it's these injections that are damaging and killing people.*** And I'm seeing that firsthand as a funeral director. And I need to tell people because if I don't put my head above the parapet and sacrifice myself, who else is going to? And it'll be no good me reflecting from one of the massive new holding centres they've built globally everywhere. There's a massive holding centre, brand new prison. We've been talking as a society; we've been talking about prison overcrowding for decades. I'm 53 now, and I've heard it been talked about for decades. So we're now at a point in time where the economies globally are on their knees. They're on their knees, and yet they've found the money to build super prisons, super huge 30,000 internment camp. What do you guys think they are for? They're for people who won't take the vaccine, they're going to call them quarantine camps, FEMA camps, they're going to put you in these camps. And I can tell you, you will swiftly be dispatched, and you'll be called a Covid death.

We're seeing exactly what we saw, allegedly in the Second World War. Now the one locally is at a place called "*HMP Wellingborough*", they're absolutely huge. It's going to take like 30,000. The buildings are huge XX, and I would urge anyone to get on Google Earth and have a look at "*HMP Wellingborough*". There's supposed to be another one in a place called "*Glen Parva*" in Leicester. And they have a crematorium next door and a huge mortuary next door. You tell me what that is for at this place in time where we are now? Why do we need these facilities building when the economy is on his knees? Who is that benefitting and what is it for? I would suggest it's for people that will not accept these lethal injections. Because over the next five years, you're going to see pretty much everyone that you know and love potentially die if they're a vaccine recipient.

This is things that I've heard from far more qualified, eminent specialists than me highly respected men universally acclaimed. And I am seeing the start of that as an undertaker now, with people coming in in their 40s 50s. I've got a guy in his 30s you know, people that shouldn't be dying, they shouldn't be getting heart conditions. They shouldn't be suffering stroke. And that's happening right now. And yet now they're targeting children. When will people wake up? Will it be when children die? Or will they believe the new variant yarn that they're going to be told? And I can tell you that's what they will say, it's a brand new variant, it's targeting children, we've all got to protect the children. And they may well try and mandate on the back of that. And then the man hunt begins and they'll be able to fill up these large quarantine centres won't they?

**Max:** Hmm. They're building them everywhere too, they're building them here in Australia.

**John:** Yeah, I've been in touch with a number of people globally from Australia and New Zealand. My heart goes out to you. I'm honestly of the opinion that the only one that's going to save Australians is Australians.

**Max:** The people have to stand up. I mean, there's usually a lot of pushback but not enough and people are becoming aware that it's a fraud, and it is. It's a quantifiable fraud.

**John:** 100 percent.

**Max:** What's some piece of advice you'd like to give to people? ...

**John:** My advice to you is to get out there and let your politicians know exactly what you think. There is strength in numbers, you are the power collectively, because the way they're chipping away at society, pretty soon you're going to be dragged off to one of these camps. How many people in your street is going to come out their house and stop that happening? If you don't help yourself, nobody else will. I can tell you, and you'll be rounded up into these camps. There'll be an outbreak in these "camps of Covid" and you'll see people carted out. Some people will buckle and they'll accept a lethal injection just to get back released to be on home lockdown. The time is now to do something because I can tell you as a funeral director, it will be no good us reflecting in 12 months' time from inside a prison cell, wishing that you'd have done something, wishing you'd have saved your children. The time to do it is now and speak out. If you're in the industry, you need to speak out. If you're in the NHS and you're about to

lose your job because you're refusing the vaccines that you know is doing this damage, for Christ's sake speak out, you owe it to people.

And very interestingly, the Hippocratic oath or the hypocritical oath, as I call it now, in hospitals, as was revised in 2001 to omit the wording we will do no harm, so does that give people licence now to harm people? I've spoken to nurses who have been called into rooms, and been told by senior medical management teams to deliver a dose of 60 milligrams of midazolam, a fatal dose to patients, patients that are not even dying, patients labelled with Covid. And in a fundamentally flawed process, the PCR test should never be done on more than 10 cycles, the guy who invented that test, those were his words. And incidentally, he's dead now. You know, he died a short while ago. They're doing 45 cycles. So the way it works is, if you're a cancer patient, you go in hospital for palliative care. And basically, palliative care, or the Liverpool pathway means you'll starve to death with a morphine driver in you.

And don't get me wrong, for some people that may be the most merciful end, and I can respect that, but the key element here is consent. And these people are having DNR's (Do Not Resuscitate) placed on them, and they're being coerced and blackmailed into signing these Liverpool pathways for people that are not even dying. Do you know people that were designated as Covid with a test that is non-descript? It's not a logical, there's no science behind it. The guy who invented it has said that, and yet they're driving forward and killing people. What more do you need to know guys? Now they're targeting your children? What are you going to do? Are you going to allow it? Are you just going to roll over, or are you going to get led off to a camp, there are enough good people out there to really make a difference, but only if you work collectively to do that. And I suspect, as I've said before, the only people that will save you guys is you.

I've listened to what your government said over there. It's a joke. It's barbaric. There are echoes of Nazi Germany in there. You're being blackmailed, coerced, forced. Every crime under the sun: threatened with your job, you can't see your mum, you can't travel, you can't work, you can't go out, you can't go food shopping, you can't go to a kid's play park. These are fundamental human rights that you've lost. And it can only ever end one way with a van pulling up outside your house and leading you off to an internment centre. And that is where it will end... So I would urge you guys to band together and to collectively take action. I'm not encouraging crime, but you are victims of crime. What are you going to do? All I can tell you is my experience as a funeral director, and I've washed and dressed well over 100 Covid cases now. Many of them still warm. You're being lied to.

**Max:** Hmm. Well, thank you, brother. I'll post this.

**John:** You're more than welcome. And I would say, anyone who wants to reach out to me to verify who I am? My name is John O'Looney and I work at my own funeral home, it's Milton Keynes "*Family Funeral Services*" in the UK. Do a search you'll find me and please do reach out to me to verify who I am because I'd be happy to pick up the phone because we all leave a legacy, guys, and if my legacy is truth and honesty, and I save one of you out there, your families are just as important as mine, you know, so if that is my gift to the world, before I'm swiftly dispatched from it, I'll take it.

**Max:** No worries, brother. Thanks for this conversation, John,

**John:** You're more than welcome. And thank you for sharing it because it's a message that I can't get out to people without people like you to share it. So I would urge everyone to share it far and wide. And if you can send me a copy back, I would have a lot of people waiting for me to share at this end as well, and I want to do that.

**Max:** Do you want me to put your email below the video?

**John:** Please do, because without you verifying that I am actually a funeral director, it doesn't carry as much weight as it does me being verified as a funeral director.

**Max:** So when you listen to that, folks, as he said, the Delta strain is vaccine damage...

**[End of Interview]**

### **3- Call to Repentance**

If after reading this testimony, as well as all the other testimonies we have made available to you, you continue to believe the lies of the agents of the devil who rule this world, you will have no more excuses. And if, in spite of all the sacrifices that these men and women are making by exposing this satanic plot at the risk of their lives, you persist in taking this poison called vaccine, it is on your own head that your blood will fall. You will have only yourselves to blame in the coming days. In the meantime, know that all these so-called new variants of Covid that the idiots who run this world are presenting to you every day, are only harmful effects of this poison that they force the whole world to take.

You all know that the word variant only appeared in the language of these mentally ill people after the launch of this poison called vaccine. As soon as they started poisoning people with their so-called vaccine, the reaction of the poison was not long in coming. People started dying from this poison, and the schizophrenics behind this evil project started telling you about variants: English variant, South African variant, Brazilian variant, Indian variant, etc. Some time later, in order to hoodwink you, these idiots changed the variants' name, and chose to talk about variant Alpha, variant Beta, variant Gamma, and variants Delta and Kappa. And all those who fall into the trap of believing what the public media based on lies says, believed.

Know that there is no such thing as a variant of anything. People are suffering and dying from the harmful effects of the poison called vaccine, which they had the misfortune to take. For those who only believe what the scientists say, here is what Luc Montagnier, French Nobel Prize winner, said: **"The variants come from vaccinations. It is indeed vaccination that created the variants. The new variants are really the production, the result of vaccinations. You always see in countries even for India, the vaccination curve and the death curve follow each other."**

If you have not yet been poisoned by this vaccine, do not take this risk. And if by misfortune you have already been poisoned, what you have to do is to run to

God, who alone can deliver you from it. The poison with which you have been inoculated is gradually killing you. While waiting to die, think of repenting. Think about where you will be after your death. Think seriously, while there is still time, about where you will spend your eternity. Remember that every person who leaves this earth is going to one of only two places where every human being will spend eternity.

If you are among those who have long believed that the notion of Hell was a fable, think again before it is too late. These agents of satan who rule this world are well aware that Hell exists. They and their master lucifer are destined for Hell. This is what justifies their extreme wickedness towards humans. They do not want to go to Hell alone; they want to go there with everyone, if not with as many people as possible. If you fall into their trap, you will regret it for all eternity. Unfortunately, it is after your death that you will realize that you were mistaken on earth. Repent now while it is still possible.

And if you want to repent, if you want to save yourself from this trap of satan and flee Hell, we recommend the teaching entitled "**Water Baptism**", which you will find on the website [www.mcreveil.org](http://www.mcreveil.org), in the Teaching section. This teaching explains everything about repentance. Do not hesitate to contact us if you have any questions, or if you need help to be saved.

***Grace to all who love our Lord Jesus Christ with an undying love!***

## **Invitation**

**Dear brothers and sisters,**

**If you have run away from fake churches and would like to know what to do, here are the two options available to you:**

**1- See if around you there are some other children of God who fear God and desire to live according to the Sound Doctrine. If you find any, feel free to join them.**

**2- If you do not find one and wish to join us, our doors are open to you. The only thing we will ask you to do is to first read all the Teachings that the Lord has given us, and which are on our website [www.mcreveil.org](http://www.mcreveil.org), to reassure yourself that they are in conformity with the Bible. If you find them in accordance with the Bible, and are ready to submit to Jesus Christ, and live by the demands of His word, we will gladly welcome you.**

**The grace of the Lord Jesus be with you!**
